

FairMate Entry

FairMate Entry ensures a steady and efficient visitor admission. The entry terminals perform multiple functions, all combined into one device: ticket scanning, badge printing and counting of persons admitted. In this way, registered visitors holding a printed or electronic ticket, have direct entry to the event without needing to queue at counters. FairMate Entry checks the validity of the ticket and admission time and gives visitors and staff acoustic and optical feedback.

FairMate Entry also stands out for its stylish and compact design. It can be easily moved, set up and configured for both access and egress.

FairMate Entry transfers all the data it collects on entries and departures to the FairMate ControlCenter, ensuring that organisers always know the precise number of visitors present on the event grounds.

- Stylish design ✓
- Combined ticket scanner, badge printer and admission counter ✓
- Easy to move and set up ✓
- Scans all types of tickets, printed or electronic ✓
- Optical and acoustic feedback ✓
- Capable of operating off-line ✓
