

FairMate MobileEntry

FairMate also offers a mobile entry solution. Portable scanners can grant admission at any given place on the fair grounds, away from the main entrances. This provides even more flexibility in managing and measuring visitor flows.

Portable scanners connect to the FairMate system by Wi-Fi. Like their stationary counterparts, they can also be used in off-line mode.

- Scalable ✓
- Functions in any location ✓
- Scans all types of tickets, printed or electronic ✓
- Acoustic feedback ✓
- Measures visitor flows at any location ✓
- Capable of operating off-line ✓
