

# FairMate Voucher

FairMate makes it easy to create and manage vouchers. The process can be integrated with your existing ERP system or embedded in your event website. Exhibitors can extend as many invitations as they like and FairMate informs the ERP system exactly which vouchers have been redeemed and how many visitors actually entered the event. This way, invoices can be created automatically and delivered immediately after the conclusion of the event.

- Integration with event website ✓
- Integration with existing ERP systems ✓
- Fully automated voucher management ✓
- Invoicing at no extra costs ✓
